The campus has a number of interesting natural features including the river, deep ravines, a couple of lakes and neem tree plantations. The idea behind the formal entrance, also referred to as the scenic drive, is that a visitor should 'experience' the natural features of the campus including the four mentioned above and then dramatically come upon the main academic area.

While the scenic drive is not yet fully commissioned, it is a nice place for a morning or evening walk and is a 'must see' on campus.
